

In this essay I am going to be supporting the killing of cane toads. I have read ~~my~~ many articles which have helped me ~~to~~ decide that they all need to die. I will also be considering the articles that try to defend them. From my research into looking into the animals it is obvious ~~that~~ that these horrible horrors are destroying the native species of Australia. For them to be stopped they ~~must~~ must be killed.

They came to the country in 1935 to allow farmers to try to keep down the cane beetle colony. The cane beetles were eating the cane ~~so~~ sugar and they thought the toads could stop them. However, the toads just grew in number.

Why are they a pest? Queensland politician Shane Kruth said cane toads are "destructive and are... killing our native wild life and taking over our habitats." (BBC A News, 2012)

~~people~~ people should also consider how to kill them in a nicer way as a lot of people are choosing to play cane toad golf. The RSPCA say that they should be killed in a humane way. All of this suggests that cane toads need to be stopped as they are more menacing than they are good. Killing animals is not nice but it is needed to be done.
